Personal Web Application

Kawthar Abdullah Alomran
202275440
SWE363 - F11

Introduction

- Build a personal portfolio website
- Apply HTML, CSS, and JavaScript concepts
- Create a responsive and user-friendly design

Technical Demonstration

- Dynamic greeting and timer
- Dark mode toggle
- Quote API integration
- Interactive skills filtering
- Show/hide project details
- Contact form validation

Technical Deep Dive

- Responsive design across devices
- API Integration challenges
- Building dynamic and interactive features using JavaScript

Conclusion

- Successfully built a complete portfolio website
- Gained a deeper understanding of HTML, CSS and JavaScript
- Improved problem-solving skills

Future improvements:

- Add more advanced features

Thank you
